the first time in the history of the world, that  
the people of the United States have been  
able to elect a President by a majority of their  
electoral votes, without the support of a single  
member of the Federal party. This is a  
fact which cannot be denied, and it is a fact  
which will be remembered with pride and  
satisfaction by every American. It is a fact  
which shows that the people of the United  
States are capable of self-government, and  
that they are willing to exercise it. It is a  
fact which shows that the Federal party  
is dead, and that the people of the United  
States are now free from its influence. It is a  
fact which shows that the people of the United  
States are now free from the influence of  
any foreign power, and that they are now  
able to govern themselves without the  
aid of any其他国家. This is a fact  
which cannot be denied, and it is a fact  
which will be remembered with pride and  
satisfaction by every American.
